Sample CV by Navifex Pro - made-up person

PROFILE

I started coding in second year by automating my university's timetable clashes. That small script taught me how much good backend work saves people time. I have interned at two software houses, shipped real APIs and I am now building my final year project: an attendance system used by three departments.

EXPERIENCE

Backend Intern Food delivery startup (sample)	Summer 2025
Software Intern Software house, Lahore (sample)	Summer 2024
Teaching Assistant, Databases University (sample)	2023 – 2025

EDUCATION

BS Computer Science Ravi Institute of Technology (sample)	2022 – 2026
FSc Pre-Engineering Lahore	2022

SKILLS

Python · Django · Node.js · PostgreSQL · REST APIs · Docker · Git

PROJECTS

Smart attendance system - QR-based attendance used by three university departments.

Timetable clash checker - A script that finds clashes in course registration.

Order API for a food startup - Order and rider APIs during a summer internship.

Library book finder - Finding books on shelves with a simple search.
